BRICKS

## BRICKS

BRICKS give you a flexible system that can be constructed and placed to suit your needs.

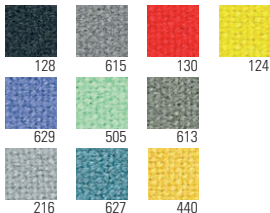

The special BRICKS modular system allows you to construct your own seating landscape – larger continuous surfaces, individually standing modules, broad sofas or easy chairs. The system is perfect for exhibition areas, foyers, lounges or other spaces.

BRICKS come in two sizes, two outer materials and an assortment of colours.

BRICKS are upholstered in wool or leather and the cushions are made of 50-kg-weight HR polyurethane cell foam with a reinforced bottom.
