HORIZON

## HORIZON

HORIZON is a modern picture frame. HORIZON consists of two individual wall fittings in stainless steel and is available in two sizes to fit horizontal photo formats 10 x 15 cm and 20 x 30 cm.

Length can be adjusted to fit your needs, according to the length of the two glass panes to be mounted into the fittings. You can use two tempered glass panes or other materials such as plexiglass or plexi-glass & veneer. The back plate need not be transparent, so other materials may be used. Additional HORIZON fittings may be ordered for a longer picture frame.

### ORDERING DISPLAY PANES

The thickness of the two panes must not exceed 12 mm and be less than 10 mm. Tempered glass panes should each be 6 mm thick. For longer formats, we recommend one HORIZON fitting at 80-100-cm intervals.

### HORIZON

HORIZON 10/15  
2 PANES: BOTH 15 WIDE x 10-12 MM THICK  
x DESIRED LENGTH. N.B. AT LEAST ONE FITTING
