RIBZONE

## RIBZONE

RIBZONE is a multi-display system in birch veneer. The characteristic ribs in oiled birch veneer can hold bulletin-board modules, shelves in galvanized steel and acrylic holders. RIBZONE comes in two sizes: 70 x 200 cm and 105 x 300 cm.

Other dimensions can be custom made. Please contact us.

RIBZONE functions as a sound-absorbing wall on its own and can be used to separate space in a room. The accessories make it possible to create a "wall of information" where visitors can take postcards or other printed matter, read notices and gather information. A range of RIBZONE accessories is available: shelves, bulletin-board modules, and displays for postcards, folders, magazines or other printed matter.
