WIRE

WIRE

WIRE is a very simple, functional shelving system with a clever twist. The shelving is a suspended system of cables in stainless steel, with steel-tube fittings for adjusting the height of shelves. The suspension system makes WIRE unique. WIRE is simply fastened between floor and ceiling, and you adjust the height for the shelves.

WIRE comes in 3 sizes: WIRE 9/3 (9 components for 3 shelves), WIRE 12/4 and WIRE 15/5.

8-mm tempered glass shelves are placed on the WIRE suspension system, or you may want shelves of plexiglass, plastic, wood or other material.

ORDERING SHELVES

SHELVING CAN BE ORDERED FROM YOUR LOCAL SUPPLIER.

SHELVE DIMENSIONS: 30 CM WIDE, 8 MM THICK TEMPERED GLASS.

When installing WIRE, there should be a maximum of 80 cm between WIRE suspension components for an 8-mm-thick glass shelf. Additional WIRE components may be ordered for a longer shelf-system.

BUG SYSTEMS can deliver total solutions in various materials. Please contact us.

WIRE

WIRE 9/3 – 9 COMPONENTS FOR 3 SHELVES
– EXCL. SHELVES
30 CM WIDE x MAX. 2.00 M LONG
